

# Trend Micro™ SafeSync

Backup, Access, & Share Your Digital Life Online

Want to simplify your life and find digital files easily from wherever you are? Trend Micro™ SafeSync keeps an unlimited number of your data files backed up, synchronized, and secure online—all in one place. You can remotely access your files any time from any online desktop, laptop, smartphone, or web device.

**SafeSync redefines online backup, storing your irreplaceable documents, photos, and music in a single safe location** that's administered by Trend Micro—an industry leader with more than 20 years of Internet security expertise.

Simple to set up and easy to use, SafeSync works silently in the background, automatically providing online backup and restoring your files in the event of a disaster, accident, or loss. SafeSync is a great insurance plan for all of your important electronic data.

## KEY BENEFITS

### Unlimited online backup and storage

Gives you peace of mind knowing you have backup copies of ALL your digital files on secure servers

### Unlimited remote access

Allows you to access your files from any computer or device that can browse the Internet

### Continuous, automatic synchronization

No need to worry about backing up because you always have access to your most current files no matter what computer or device you are using

### Industry Leading Security

Rest easy knowing that the Internet security leader, Trend Micro, with 20+ years of experience, is safeguarding your digital files

### PROTECT

SafeSync works quietly behind the scenes, backing up files to your online vault

### SYNC

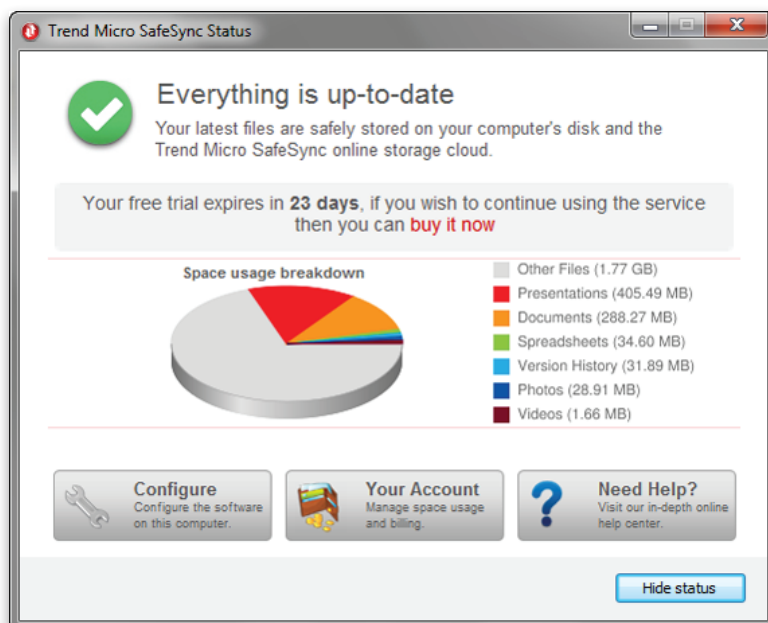

SafeSync keeps your files synchronized and up-to-date across multiple computers

### ACCESS

Have your files at your fingertips, accessing them anywhere from any computer or mobile phone

### SHARE

Easily invite your Facebook, Hotmail, or Gmail contacts to view your shared albums

## AUTOMATIC SYNC

SafeSync seamlessly integrates into your online desktop environment, automatically keeping your data files synchronized and up-to-date across multiple computers and devices. SafeSync has a synchronization client, a piece of software that you download onto all your devices to keep your backup files current as you make changes.

### SafeSync Security

#### Confidentiality

Trend Micro cannot see your files without your authorization

#### Data storage clusters

Each file is secured on multiple independent storage clusters with continuous back up

#### Encryption

Data is transferred using the same 256-bit AES encryption used by financial institutions for security

#### Remote access control

You have the ability to share or revoke access to your shared files at any time

#### Network and server security

Our system uses an industry best practice secure permission structure to safeguard file access

#### Firewalls

Defends equipment from cyber attack with multiple firewalls

#### Load balancers

Ensures constant availability of online backup and file restoration, even in the event of equipment failure

#### Application servers

Redundant servers ensure you can always access your data

#### Network partitioning

Storage clusters cannot be accessed from the Internet
